**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,824,017 to Sluijter.

Sluijter shows a beverage dispensing appliance as seen in Figs. 2-5, having a beverage container 31 housed in the appliance, a tap adapter 43 with a first male gas connector 42 and a gas line 41 to charge the container with a pressurized gas, a gas connecting locating member 44, a gas supply line 33 housed in the container 31 having a female second gas connector and conical guide, see column 4, lines 44-52, the second gas line connector connects with the first gas connector, guide-ways 64 and 64', first and second locking fingers 51 and 51' rotatable in the guide-ways, a locking member lever arm 57, locking fingers limiting stops 70, a closeable door 43 and a lever arm 57.

***Allowable Subject Matter***

3. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments filed November 13, 2009 have been fully considered but they are not persuasive. In response to applicant's argument that the device of Sluijter can not be adapted for receiving the gas connection locating member, see column 4, lines 44-52 and Fig. 3, the connector 33 on the container is designed with a conical shaped inlet part to guide the gas connectors into sealing engagement. The locating elements 44 and guides 64 are an additional guiding aid for the tap adapter assembly 43.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
